COVID-19 (Novel Coronavirus) Health and Safety Information

The Government announced that from 6pm 12 March until 29 March, all schools and higher education institutions should close.

Further to this announcement we wanted to let you know that Tyndall has implemented changes in the way we work and interact with our colleagues, students and business partners. We are committed to the health and wellbeing of all of our staff and students.

Tyndall staff will work remotely to the maximum extent possible during this period, in line with Government advice issued. Critical services (including critical research infrastructure) will be maintained.

Tyndall and UCC's Emergency Management Team will continue to meet regularly to ensure its community is protected.
