IPIC and Tyndall Institute are offering a generous competitive bursary for undergraduate students in physics, mathematics and engineering looking to gain insight into a research environment. This student bursary provides the opportunity to work with our world-class teams in an immersive research experience. Interns will undertake a 10-week research project complemented by a workshop series in which students will learn about communication skills and research commercialisation among others.

IPIC and Tyndall will provide **20 summer bursaries** for their 2020 programme.

Applications are now open for the 2020 programme. Further details are available at [www.ipic.ie/join-us](http://www.ipic.ie/join-us)

"The programme has proved an invaluable and extremely enjoyable experience for me, one which I would recommend to anyone seriously interested in a research career in the future."

"Spending time in Tyndall has always given me more perspective and understanding as to what a research career means."

"This programme has given me a greater insight into a research career. I now have a better idea of what takes to successfully pursue one."
